

## Aerosol

System dust destruction to prevent the occurrence of dust and particulate mass, using aerosol (Artificial fog), on construction sites / demolition, to me, in places where they dig tunnels in the stone, in places where stored waste, waste (inhibition of smell), etc.

### Innovation

Spray radius of 30 m – artificial fog prevents the formation of puddles and mud.

### FEATURES

- Maximum range of spray
- Swivel Radius spray head is 360
- Coating of fog that prevents dust from working the land
- Simple handling
- Adjust spray according to the desired distance
- Adjust spray depending on the amounts you need
- Option of bow spray
- Easy maintenance of spray nozzles
- Central control computer system for one or more devices aerosol

### TECHNICAL DATA

- Maximum distance served – 20-30 m
- Water consumption – approx. 0.5 cm / h
- Minimum Water Pressure – 2 bar
- Water flow
- Tip Central – 0,5 – 1,5 cm / h
- 1 ring nozzle – 0,5 – 4 cm / h
- 2 rings of nozzle – 1 to 8 cm / h
- Power – 4.6 kW

### WEIGHT & DIMENSIONS

- Height – 3.5 – 6 m
- Weight – 150 kg

### ACCESSORIES

Water Hoses
